NOTES TO FINANCIAL STATEMENTS

(Full Version)

Quarter I of 2025

As of March 31, 2025

I. CHARACTERISTICS OF BUSINESS OPERATIONS

1. Ownership structure

The predecessor of Lam Dong Water Supply and Sewerage Joint Stock Company was Lam Dong Water Supply and Sewerage One-Member Limited Liability Company (100% state-owned capital), established under Decision No. 2873/QĐ-UBND dated October 18, 2005, by the People's Committee of Lam Dong Province on the conversion of the state-owned enterprise Lam Dong Water Supply Company into Lam Dong Water Supply and Sewerage One-Member Limited Liability Company.

the Company implemented the equitization of the state-owned enterprise according to Decision No. 774/QĐ-UBND dated April 23, 2015, issued by the People's Committee of Lam Dong Province, which approved the roadmap for restructuring state-owned enterprises under the management of Lam Dong Province. Additionally, Decision No. 2660/QĐ-UBND dated December 8, 2017, by the People's Committee of Lam Dong Province, approved the capital structure during the transition to a joint stock company. The enterprise's valuation as of June 30, 2016, was approved for equitization by Decision No. 534/QĐ-UBND dated March 20, 2017, issued by the People's Committee of Lam Dong Province.

The Company was granted an Enterprise Registration Certificate for conversion into a joint stock company by the Department of Planning and Investment of Lam Dong Province under enterprise code 5800000174 on June 22, 2018, with charter capital of VND 788,000,000,000 (seven hundred eighty-eight billion dong)

2. **Business lines:** Production and supply of domestic water, construction and installation of water supply and Sewerage systems.

3. Business activities

The Company's main activities during the period include:

- Production and supply of domestic water for urban and industrial use.
- Consulting and designing construction projects for civil works, water supply, and drainage projects; supervision of civil, industrial, water supply, drainage, and irrigation projects. Preparation of construction investment projects, project verification, and environmental impact assessment. Budget estimation and construction design for civil, industrial, water supply, drainage, and irrigation projects.
- Installation of water supply, drainage, heating, and air conditioning systems.
- Construction of water supply and drainage systems, industrial and civil works, irrigation, resorts, eco-gardens, and leisure parks. Production and trading of materials and equipment related to the water sector. Provision of tourism services for sightseeing and resorts. Planning and consulting for water supply and drainage systems, tender documentation, bid evaluation, and project management. Conducting surveys on terrain, geology, hydrology, and environmental factors.

4. The Company has the following Member units:

Member units	Address	Main business activities

II. ACCOUNTING PERIOD AND CURRENCY

1. The Company's fiscal year begins on 1 January and ends on 31 December each year.
2. The currency used for accounting purposes is the Vietnamese Dong (VND).

III. ACCOUNTING SYSTEM

1. Accounting system applied:

The Company applies the Enterprise Accounting System issued under Circular No. 200/2014/TT-BTC dated December 22, 2014, and Circular No. 53/2016/TT-BTC dated March 21, 2016, issued by the Ministry of Finance, which amends and supplements certain provisions of Circular No. 200/2014/TT-BTC.

2. Accounting method applied

The Company applies the voucher-based bookkeeping system.

IV. DECLARATION OF COMPLIANCE WITH VIETNAMESE ACCOUNTING STANDARDS AND SYSTEM

The Company has applied Vietnamese Accounting Standards and all guiding documents issued by the government. The financial statements are prepared and presented in full compliance with the regulations of each standard, guiding circulars, and the applicable accounting system.

V. APPLIED ACCOUNTING POLICIES

1. Principles for recognizing cash and cash equivalents

Transactions in foreign currencies are converted to VND using the actual exchange rate (or the interbank average exchange rate) at the time of the transaction. At year-end, monetary items in foreign currencies are converted at the interbank average exchange rate announced by the State Bank of Vietnam on the last day of the fiscal year.

Exchange rate differences arising during the period and from revaluing long-term foreign currency debts at year-end are recorded in financial income or expenses for the fiscal year

Exchange rate differences arising from revaluation of foreign currency monetary items and short-term liabilities at the end of the fiscal year are recorded in the exchange rate difference account. At the beginning of the following year, these are reversed to eliminate the balance

Short-term investments with a maturity of no more than three months that can be easily converted into cash with minimal risk of value change are classified as cash equivalents as of the reporting date.

2. Principles for recognizing inventories

Inventory is recorded at historical cost. If the net realizable value is lower than the historical cost, the inventory is valued at net realizable value. The cost of inventory includes purchase costs, processing costs, and other directly attributable costs incurred to bring the inventory to its current location and condition.

The weighted average method is used to calculate inventory value.

Inventory is recorded using the perpetual inventory system.

Provisions for inventory devaluation are made at year-end and represent the difference between the historical cost of inventory and its net realizable value if the former is higher.

3. Principles for recognizing and depreciating fixed assets (FAs)

Tangible and intangible fixed assets are recorded at historical cost. During use, tangible and intangible fixed assets are recorded at original cost, accumulated depreciation, and net book value.

Depreciation is calculated using the straight-line method over the following estimated useful lives:

- Buildings and structures	10 - 50 years
- Machinery and equipment	10 - 10 years
- Motor Vehicles	10 - 30 years
- Office Equipment and tools for management	08 - 08 years
- Other tangible fixed assets	25 - 25 years

4. Principles for recognizing financial investments

Investments in subsidiaries and associates are recorded at cost. Net profits distributed by subsidiaries after the date of investment are recognized in the income statement. Other distributions (other than net profits) are considered returns on investments and reduce the carrying amount of the investments.

Investments in securities as of the reporting date are classified as:

- "Cash equivalents" if the recovery or maturity period is no more than three months from the purchase date.
- Short-term assets if the recovery period is within one year or one operating cycle.
- Long-term assets if the recovery period is over one year or exceeds one operating cycle.

Provisions for investment devaluation are made at year-end and represent the difference between the historical cost of investments and their market value if the former is higher.

5. Principles for recognizing and capitalizing borrowing costs

Borrowing costs are recognized as production and business expenses in the period incurred, except for borrowing costs directly related to the construction or production of qualifying assets. These are capitalized as part of the cost of those assets when the criteria under Vietnamese Accounting Standard No. 16 "Borrowing Costs" are met.

6. Principles for recognizing and capitalizing other expenses

Prepaid expenses related to the current fiscal year are classified as short-term prepaid expenses and allocated to production and business costs in the same fiscal year.

The following expenses were incurred during the fiscal year but were recorded as long-term prepaid expenses to be gradually allocated to business performance over several years:

- Tools and supplies put into use are allocated to expenses during the period using the straight-line method with an allocation period of no more than 2 years.
- Other outsourced expenses are allocated according to the term of the contract.

7. Principles for recognizing accrued expenses

Accrued expenses are recognized based on reasonable estimates of the amount payable for goods and

8. Principles and methods for recognizing provisions for liabilities

9. Principles for recognizing owner's equity

Owner's invested capital is recognized at the actual capital contribution of the owner.

Share premium reflects the difference between the par value, direct costs related to the issuance of shares, and the issuing price of shares (including cases of re-issuing treasury shares). This difference may be positive (if the issuing price exceeds the par value and direct issuance costs) or negative (if the issuing price is lower than the par value and direct issuance costs).

Other equity under Owners' Equity reflects capital generated from business results, gifts, donations, sponsorships, or asset revaluations (if permitted to adjust Owners' Equity).

Investment capital for construction projects is recognized at the actual amount allocated for the Company's construction investments.

Undistributed post-tax profit is the profit from the Company's activities after deducting (-) adjustments for retrospective changes in accounting policies and corrections of significant prior-year errors.

Post-tax profit distribution for dividends is made to shareholders after approval by the General Shareholders' Meeting and after appropriations for reserves as stipulated in the Company's charter.

Dividends are declared and paid based on the realized profit. Officially declared dividends are paid in the subsequent fiscal year upon approval by the General Shareholders' Meeting.

10. Principles and methods for recognizing revenue

Revenue from sales of goods

Sales revenue is recognized when all the following conditions are met:

- The significant risks and rewards of ownership of the goods or products have been transferred to the
- the Company no longer retains control over the goods or manages them as the owner.
- The amount of revenue can be reliably measured.
- the Company is likely to receive economic benefits from the sales transaction;
- The costs associated with the transaction can be reliably determined.

Revenue from provision of services

Service revenue is recognized when the outcome of the transaction can be reliably measured. If the service provision spans multiple periods, revenue is recognized based on the portion of work completed as of the balance sheet date. The outcome of the service transaction is determined when the following conditions are met:

- The amount of revenue can be reliably measured.
- The economic benefits from the service transaction are likely to flow to the Company.
- The completed portion of the work can be measured as of the balance sheet date.
- The costs incurred for the transaction and to complete the service can be determined.

The completed portion of the service is determined based on the "percentage of completion" method..

Financial income

Income from interest, royalties, dividends, profit sharing, and other financial income is recognized when both of the following conditions are met:

- It is probable that economic benefits will be derived from that transaction;
- Revenue can be measured reliably.

Dividends and profit sharing are recognized when the Company has the right to receive dividends or the right to receive profits from capital contributions.

11. Principles and methods for recognizing financial expenses

Financial expenses include:

- Costs or losses related to financial investment activities;
- Borrowing or lending costs;
- Losses due to exchange rate fluctuations from foreign currency-related transactions;
- Provisions for securities investment devaluation.

These items are recorded based on the total incurred during the period and are not offset against financial income.

12. Principles and methods for recognizing current corporate income tax expenses, deferred corporate income tax expenses

Current income tax expense is determined based on taxable income and the corporate income tax rate in the current year.

Deferred income tax expense is determined based on deductible temporary differences, taxable temporary differences and the corporate income tax rate.

The Company is currently applying a corporate income tax rate of 20% for clean water supply, wastewater treatment and water pipe installation activities.
